

TurkeyHill

POI Installation Instructions - Garmin

Custom POI files require the use of the Garmin POI Loader tool. You can download this tool here:

<http://www8.garmin.com/products/poiloader/>

Turkey Hill Minit Markets does not provide support for Garmin's software tools. Please contact Garmin for support of Garmin tools.

1. Confirm compatibility of your particular GPS device with Garmin POI Loader by referring to your GPS owner's manual.
2. Download the POI files from <http://www.turkeyhillstores.com>.
3. Custom POI files must be saved in a directory on your computer that is **only** for custom POI files and that contains no other files.
 - a. We recommend creating a new folder in your "My Documents" folder called "My POI".
 - b. Store all of your custom POI files in this new folder.
4. All files you download are compressed in ZIP format. You must unzip the downloaded files before you use them.
5. Turn on your Garmin GPS device and connect it to your PC. If you are using a card reader, connect it to your PC.
6. Start the Garmin POI Loader software tool on your computer and click **Next**.
7. Make sure the appropriate device appears in the Device field. If not, click Find Device. If you have multiple devices connected to your PC, select the device you want from the drop-down list.
8. Click **Next**.
9. Select the directory where the data files can be found. If you followed our recommendation above, you will find it in the "My Documents / My POI" folder.
10. Select the appropriate units for distance and speed (Feet and MPH or Meters and KPH).
11. Select Express, then click **Next**. POI Loader will install the POIs on your device.
12. Click **Finish**.
